

Purification®

Introduction

Purification essential oil blend is a versatile combination of Young Living Therapeutic Grade™ essential oils created to meet a variety of everyday needs. Citronella is combined with rosemary, lavandin, and lemongrass essential oils to cleanse and soothe insect bites. When diffused, it helps to purify and cleanse the air from unwanted odors.

History

Purification has a clean, refreshing, uplifting scent that is beneficial for the home and body. When diffused in the air it can neutralize foul odors, which is an ideal alternative to using chemical-filled sprays around the home. Purification also has benefits when applied topically to the skin, especially after an uncomfortable bug bite. Use it to cleanse and soothe skin and combat the effects of painful bites from spiders, bees, hornets, and wasps. With Purification on hand, you'll find that it even naturally repels these pests. And if you have pets, Purification can also remove undesirable smells from litter boxes and other sources of odor.

Key Ingredients

- Citronella contributes to Purification's fruity smell. Citronella is great on the skin and helps repel certain insects.

- Lemongrass has a potent, refreshing scent that will leave you feeling refreshed and rejuvenated.

- Lavandin is a cousin of lavender and has wound-healing properties and supports general skin health.

- Rosemary has a stimulating and invigorating effect, and is commonly used for room diffusers, controlling mold, and uplifting spirits.

- Melaleuca is sometimes called tea tree oil and has historically been used by aboriginal Australians for bruises, insect bites, and skin infections.

Primary Benefits

- Eliminates unwanted odors and purifies the air.
- Cleanses and soothes skin from insect bites.
- Purification has an uplifting and rejuvenating aroma when diffused or inhaled directly from the bottle.

How To Use

Put a few drops of Purification on a cotton ball and place them around the house, car, or where you need it the most. Try adding a few drops to a spray bottle to freshen furniture and carpet. Purification also works well on bathroom surfaces to clean mildew and hard-water stains.

For pets, take one cup of baking soda and twenty drops of Purification, mix well, and sprinkle some in the litter box. You can also use this baking soda blend on carpets when your animals have had an accident. Add Purification with water in a spray bottle and apply it directly to the stain to neutralize the odors as well.

Did You Know?

- Purification can also be used to remove bathroom hard-water stains.

- Purification is a handy first-aid remedy. Keep some in your purse and first-aid kit.

Caution

Purification includes citronella which may react with certain skin types. If used topically, first dilute with a vegetable oil to test.

Purification Testimonials

Purification helped my grandson fight RSV

Author: Scott Ramsey

Posted: Jul 12, 2007

My grandson developed a swelling on the side of his neck which was like a tennis ball. He was hospitalized for 24 hours on IV antibiotics. They did not help. The swelling went down some, and they sent him home.

My daughter called me and I told her to try 4 drops of Purification essential oil on it. She called back about 4 hours later to say that the swelling was gone. God Bless Essential Oils!

Zits in my ears

Author: Marilyn Kinman

Posted: Dec 15, 2010

I do not suffer from cold sores or canker sores, but I get these little zits in my ears all the time. I use Purification for this. The zits clear up within 24-48 hours. It has been wonderful, because these little buggers HURT! I KNOW Purification works for cold sores. I use Purification on anything that even remotely speaks of inflammation or infection. It's a wonder oil

Mosquito bites respond to Purification oil

Author: Vickie Chu-Hermis

Posted: Sep 04, 2008

My husband does not like to use essential oils, or as he calls them, 'my voo doo', but one

night there was a mosquito buzzing around our bedroom that kept biting him. He woke up with several bites on him so while he was still groggy, I whipped out my Purification oil and put it on all of his bites then he went back to bed. The next morning, I asked how his bites were...to his surprise, they stopped itching and the mosquito left him alone. Yay for 'voo doo'

Purification and a spider bite

Author: Gayle Oade

Posted: Oct 14, 2008

Several years ago when I was new to essential oils I got bit by a spider, the bite grew to the size of a chicken's egg. Being new to the oils I did not think of the oils right away, instead I went to the local Urgent Care room where I was told to take antibiotics and that it would take about 10 days to drain.

I later consulted the friend who introduced me to the oils and she suggested that I constantly put Purification on the bite, which I did and the infection went away in 3 days vs the 10 the Doctor said.

Purification and ticks do not get along

Author: Wyndee Clara

Posted: Jul 08, 2010

In the shower this morning, I found a tick between my big and second toe. I had no idea how long he had been there. I have always been terrible at removing them with tweezers, so I decided to try purification instead. I loaded a q-tip and rubbed it around the area and he just barely moved. For the longest time, he seemed not to be bothered by it and I even wondered if he was still alive. Just when I'd determined he was dead, he would move again. After about 15 minutes, he finally decided it was time to leave and backed out. Yeah!! Lesson learned, don't be impatient and quit. Take the time and it WILL work!!

Mildew gone with Purification

Author: Barbara Holt

Posted: Sep 06, 2007

I recently gave a friend some purification to clean the mildew from his camping bedroll. We rubbed the oil directly on the mildew and it disappeared! I gave him some to take home and he was very impressed.

Toenail fungus killer

Author: Catherine Mura

Posted: Sep 21, 2007

For over the past decade, I have battled with toenail fungus under my two big toes. I had gone to the dermatologist to seek treatment and found out that the medication for treatment could take up to a year and had bad side effects to your liver.

I started applying Purification on my toenails and it worked right away. When new growth started to appear at the cuticle line, the new growth was healthy and without fungus. I continued to apply Purification once a week, and as my toenail grew out, there was no more brown or black discoloration under my nail.

I have to continue to apply Purification on my nails, even though they look healthy, or the fungus will return. If this happens, I apply Purification and it takes care of the problem.

Spider bite vs. Purification oil

Author: Susan Heil

Posted: Oct 10, 2010

Last week a co-worker with a swollen, hardened calf muscle, an area the size of a hand, was wondering what had happened

to her. I said,' Hey, that's a spider bite, and I can take care of it quick and easy.' I had her massage in one drop of Purification oil. She left and reported the next day that the swelling and hardness were gone. She thanked me, only to return the third day asking for another drop of Purification because her leg really itched.

I checked the bite and noticed the skin was soft and no longer swollen and there were no signs of peeling, but a red spot remained. So, she applied one more drop of Purification and had no more complaints. So, a major spider bite was totally healed by two one-drop applications of Purification oil massaged in two days apart. Awesome!

Bladder infection gone!

Author: Dianne Hansen

Posted: Dec 11, 2008

Purification drops the spiders and flies right off the wall and ceiling, in Montana! We need Purification here in the country. I don't really like to find flies on the floor, but I love knowing my Purification oil is working. We have a diffuser going several hours a day. Buy a diffuser and you'll see.

Bee sting soothed with Purification

Author: Debbie Millies

Posted: May 29, 2008

I love purification for bug bites. It stops the itch and the pain. I got stung on the back of the neck by a yellow jacket and it hurt alot until I applied Purification. It took the pain away and kept the swelling down. I always carry it with me, especially in the summer.

I make mosquito spray with 10-15 drops of purification, 2 oz of water and a drop of a liquid soap. Work's great. After gardening I noticed many red bug bites that started to itch. I applied Purification to each one, neat, they no longer itched and they started to heal.

Bladder infection gone!

Author: Andrea Kulp

Posted: Nov 23, 2010

I recently felt the pains of an oncoming UTI... pain and frequent urination. I put 3 drops of Purification with organic olive oil in 2 capsules. The next time I urinated, it smelled like Purification! After 3 more times of eliminating, the pain and urge were gone!!!

Blisters & Purification Oil

Author: Marlys Penne

Posted: Sep 14, 2010

I had two blisters on my hand from raking the yard without wearing gloves. I put a couple of drops of Purification oil on the blisters two different times that day (don't know why I chose Purification). The large blister broke open a day later. It is now two days later - both blisters are now only red spots on my hand, they are completely covered with soft skin. I don't recall having had blisters heal that quickly in the past. I've been using Young Living oils for years, I'm still amazed by them!
